Preface

This document provides information about the services and functions available within the **nXbot** chatbot application (referred to simply as "the app" in the remainder of this document) and how to access them.

This edition applies to version **1.0** of **Netlynx** and to all subsequent versions, releases, and modifications until otherwise indicated in new editions. Please make sure you are using and referring to the correct document edition for the learning of the product.

This guide is intended for the users who want to use this **nXbot** chatbot application to access the interactive features/services for their business.

Purpose

1. The user guide is intended for new and existing users, Customers and Partners with less or with no experience in using the **nXbot** chatbot application.
2. It helps customers with answers to their questions and fulfil an array of activities.

Scope

The goal of this document is to give a broad overview and to write a working chatbot by applying some of the innovative techniques and "intelligent" features that we have seen across the online world. This means that our chatbot should not only look for predefined keywords and use them to query a database but to implement "intelligent" features .i.e. prompt response, query sharing etc. We have also integrated the accessibility features to the **nXbot** chatbot application.

Overall Layout and Details

Click on the below icon to start the interaction with **Lynx (your virtual partner)** in the questions and sub-questions or messages format.

When you click on the icon, you will see the below screen where greetings, welcome message and level-1 menu options will be displayed.

A detailed annotated screenshot of the Lynx chat interface. The interface features an orange header bar with the 'nXbot' logo on the left, the text 'I am Lynx Your virtual assistant' in the center, and an accessibility icon and a close button on the right. Below the header, a message reads: 'Please select one menu from the options below so I can take you to the right place.' This is followed by a list of menu options: 'Do you want to know more about us?', 'What type of service are you looking for?', 'Are you interested in Requesting a Quote?', 'Leadership', 'Request a Call Back', 'Connect with an Online Executive?', 'Something else', and 'Follow us on'. At the bottom, there is a text input field labeled 'Type your message' with a send button, and a footer that says 'Powered by: Netlynx' and a help icon. The following table summarizes the labeled components in the image:

Component	Description
Top-Left space for company logo and header	Area containing the nXbot logo and the text 'I am Lynx Your virtual assistant'.
User defined background image and controlled with admin panel	The background area of the chat window.
Accessibility options menu	Icon representing accessibility options.
Close button	Red circle with a white 'X' icon.
Greetings and Welcome message	The text: 'Hi there 🙌, I am Lynx, your virtual assistant, how can I help you today?'.
Level-1 menu options	The list of menu options: 'Do you want to know more about us?', 'What type of service are you looking for?', 'Are you interested in Requesting a Quote?', 'Leadership', 'Request a Call Back', 'Connect with an Online Executive?', 'Something else', and 'Follow us on'.
Space to type your query or shortcut keys for menu	The text input field labeled 'Type your message'.
Powered by details And User Guide	The footer text 'Powered by: Netlynx' and the help icon.

OUr Portfolio	ALT + U or u
Request a Call Back	ALT + C or c
Connect with Online Executive?	ALT + O or o
SomeThing else	ALT + T or t

Feedback

Before closing the **nXbot**, you will need to submit the ratings for overall **nXbot** and its features.

Click on Close button

Below popup will show up on screen

A feedback popup form with a dark blue header and a white body. At the top left is a circular profile picture of a woman with glasses. The header text reads "LIKE OUR CHATBOT?" followed by "Please share your rating with us to make the chatbot even more awesome, Thanks." Below this is a five-star rating system with five red stars. A blue "Not Now" link is positioned below the stars. At the bottom center is a dark grey "Submit" button.

You need to submit the star based ratings and click on the Submit button. On submitting the rating, your ratings will be saved and **nXbot** will be closed.

If you click on Not Now, you will again be redirected to the **nXbot**.

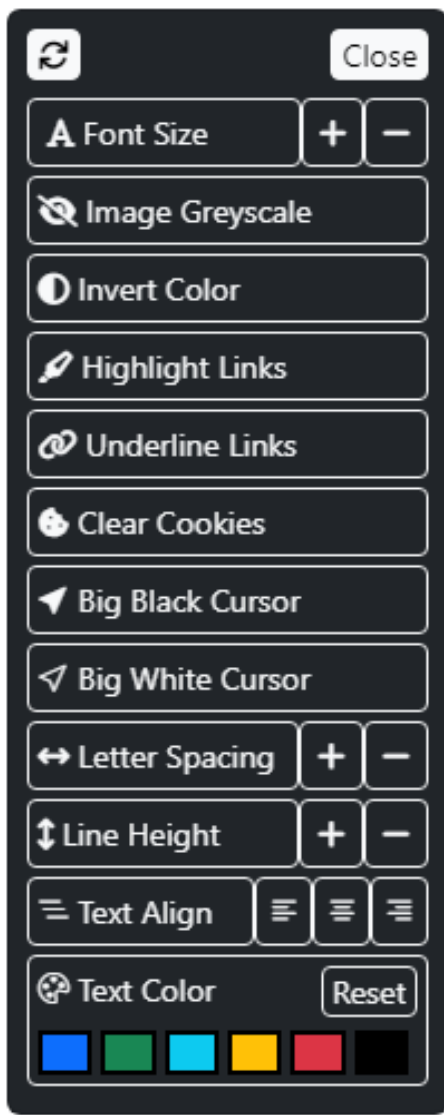

Move the **nXbot**

To move the chatbot, you can move the mouse pointer on the header area of the **nXbot** and click and move the chatbot window horizontally to **left-center-right position**

Accessibility Options

Accessibility options are designed to help people with disabilities use technology more easily.

Glossary of Terms

1. **Lynx:** Your virtual partner
2. **Chat:** To take a part in an online discussion in a chat room
3. **Bot:** An autonomous program on the internet or another network that can interact with systems or users
4. **Discussion:** The action or process of talking about something in order to reach a decision or to exchange ideas
5. **Conversation:** A talk, especially an informal one, between two or more people, in which news and ideas are exchanged
6. **Accessibility:** It can be viewed as the "ability to access". The concept focuses on enabling access for people with disabilities, or enabling access through the use of assistive technology
7. **Message:** Displays a simple text message to the user
8. **Online Form:** To collect important data from your users
9. **Live Chat:** Talk to your Live users
10. **Media:** Photos, videos, GIFs, PDFs and files sending to your users
11. **Online Payment:** Allows you to create payments to be made for your users
12. **Artificial intelligence (AI):** It is an all-encompassing field. Artificial intelligence is intelligence demonstrated by machines
13. **Autoresponder:** It is a message that is automatically triggered when a user sends the first message or query, or specific keyword to the bot
14. **Intent:** An intent represents the purpose of the user input
15. **Natural language understanding (NLU):** It is a subfield of natural language processing (NLP) that aims to understand the intended meaning of chatbot name
16. **Virtual Agent:** A virtual agent is a computer-generated virtual character that serves customers
